SUMMARY

I bring a background in consulting, service delivery, and project coordination together with training in full-stack development through The Odin Project, a combination that lets me bridge the gap between technical and client-facing teams. Skilled at producing accurate, client-facing reports and documentation, coordinating multi-stakeholder projects and programmes to milestones. Structured and process-minded, with experience designing automated workflows to improve efficiency.

PROFESSIONAL EXPERIENCE

Full Stack Development Training | 2024 – Present

The Odin Project – An open-source, project-based full-stack web development curriculum.

- Designed and deployed a multi-agent, agentic AI workflow using OpenClaw and Claude to automate the job-search process, reducing time spent by 83%.
- Completing full-stack curriculum covering fundamental computer science, data structures and algorithms, SOLID principles, and debugging in HTML, CSS, and JS.

Transport Planner | 2023–2024

Highgate Transportation, Bristol, UK – Transport consultancy

- Produced client-facing reports and conducted research to support transport planning proposals, recommendations, and regulatory compliance.

Travel Demand Planner | 2021–2023

Auckland Transport, Auckland, NZ – Public sector transport authority

- Managed a portfolio of 20+ client organisations through onboarding, engagement, and delivery milestones as primary point of contact, delivering workshops and training to drive user adoption and behavioural change
- Designed and delivered a six-month pilot of a new mobile application, covering planning, user recruitment, training, engagement tracking, and feedback collection
- Led nationwide campaign delivery, coordinating with councils and stakeholders to restore participation levels following COVID-19 disruption
- Monitored engagement and performance using data, KPIs, and qualitative feedback, producing clear reports and guidance for internal and external stakeholders

OTHER EXPERIENCE

Temp Administration, Research, and Hospitality | 2020–2023

Asahi Beverages, Auckland Council, IFM Electrical, Coreiss, and others.

Copywriter | 2018–2020

Coster Content Ltd, Manchester, UK | Marketing agency

EDUCATION

Integrated Master’s in Geography with International Development
University of Manchester

MSc International Development:

Focused on analysing complex, interconnected systems involving institutions, policy, technology, and global economics. Developed strengths in systems analysis, structured research, technical writing, and project-based collaboration.

BA Geography:

Focused on understanding how social, economic, and environmental systems interact at local and global scales. Gained practical skills in research, data analysis, policy analysis, and problem-solving.

KEY
COMPETENCIES

- Client delivery and coordination in multi-stakeholder environments
- Workshop delivery and user onboarding
- AI-assisted automation and process design
- Structured problem-solving and systems thinking
- Translating technical concepts for non-technical stakeholders
- Documentation, reporting, and attention to detail
- Time management and prioritisation across concurrent workstreams
- Clear written and verbal communication

SOFTWARE &
TOOLS

- Development: data structures, algorithms, SOLID principles, security, HTML, CSS, JavaScript, Node.js
- AI & Automation: OpenClaw, MCP, API integration (Microsoft Graph, Google Workspace, OpenAI), agentic workflow design
- Productivity & Collaboration: Microsoft 365 (Office, OneDrive, SharePoint), Azure, DevOps, Google Drive, Dropbox

CERTIFICATES

ICAgile Certified Professional | 2022
Agile workflows and teamwork

Project Management Institute Training | 2022
Practical project management skills
